1 Summary

This Implementation Guide describes how to integrate **paypal_credit_financing_options** version 22.1.0 into Commerce Cloud reference application Store Front Reference Architecture (SFRA) and **int_paypal** version 22.1.0

The **paypal_credit_financing_options** include:

- Credit Financing Options

For more information, contact your PayPal support manager.

2 Component Overview

2.1 Credit Financing Options

The financing calculator is only available for UK-based PayPal merchants. Please reach out to Braintree/PayPal support to enable this feature for your account and get further details.

PayPal UK merchants can use this feature to present financing options, such as installment, same-as-cash, and no-interest options, to buyers paying for goods or services.

For more details check [Credit Financing Options Integration Guide](#)

3 Implementation Guide

3.1 Overview

paypal_credit_financing_options require **int_paypal** cartridge version 22.1.0 to work properly.

3.2 Installation

3.2.1 Import metadata file

1. Upload and import paypal-credit-financial-options.xml from the metadata folder. To do so, go to **Business Manager > Administration > Site Development > Import & Export**. Click on **Upload** and add **paypal_credit_financing_options.xml** file from meta folder in your local file system.
2. Import file from **Import & Export** menu. Click on import in Meta Data section and choose **paypal-credit-financial-options.xml** from the list.

Import & Export

Meta Data
 and your system meta data (i.e., system type extensions, custom object types, custom preference definitions).

Geolocations
 geolocations for a country.

Import & Export Files
 and your import and export files.

Figure 1. Metadata sections in Import & Export

3.2.2 Add cartridge to cartridge path

Add **paypal_credit_financing_options** into the cartridge path of a target site. To do so, go to **Business Manager > Administration > Sites > Manage Sites > Your Target Site > Settings** and insert **int_paypal** before your cartridges record, as shown in Figure 2.

Instance Type: All

Cartridges:

Effective Cartridge Path:

- int_paypalplugin_financial
- int_paypal
- app_storefront_base
- plugin_apple_pay
- plugin_facebook
- plugin_pinterest_commerce
- plugin_web_payments
- bc_content
- core

Figure 2. Storefront cartridge path

3.2.3 Enable Custom cache

Custom cache required for fast and stable work on the integration. Navigate to **Business Manager > Administration > Operations > Custom Caches** and check checkbox **Enable Caching**.

One custom cache object used by the integration

1. paypalCreditFinancingOptions - custom site preferences cached. Out of the box, the integration supports single site usage and custom preferences are cached. For multiple sites we recommend customizing cache logic in the cartridge.

NOTE: Custom Cache could be disabled for developing or testing purposes. But we don't recommend disabling it on production and staging to avoid performance issue and http calls quota violation.

3.3 Configuration

3.3.1 Updating Cartridge Custom Site Preferences

Go to **Business Manager > Merchant Tools > Site Preferences > Custom Site Preferences**. You'll see new Custom Site Preference Group called PayPal Credit Financing Options.

ID	Name	Description	Preferences	View Across Sites
Storefront Configs	Storefront Configurations		14	View
Paypal_Branding	PayPal Branding (NVP)		9	View
Paypal_Express_Checkout	PayPal Express Checkout (NVP)		15	View
Paypal_Checkout	Paypal Configuration		6	View
Paypal_Credit_Messaging	Paypal Credit Messaging		3	View
Paypal_Credit_Financial_O...	PayPal Credit Financing Options and Marketing Solution		4	View

Figure 3. PayPal Credit Financial Options Configuration Custom Site Preferences

Click **View** for PayPal Credit Financial Options. Detailed description about each option is available under preference name on the page.

List of preferences:

- Enable PayPal UK Credit Financial Options Banners - show/hide Financial banners and options.
- Merchant Publisher ID - Merchant Id for credit banners
- Campaign ID for PayPal credit banner - Allow to bind credit banner visibility to existed promotion campaign in business manager.

4 Operation and Maintenance

4.1 Testing

You must obtain your own test account on the [PayPal Developer Portal](#). If you can't create your own PayPal Sandbox account, contact PayPal support.

4.2 Logs

Cartridge uses `int_paypal` mechanism for logging errors.

4.3 SFRA core templates overlay list

The following templates from `app_storefront_base` cartridges been overlay by `int_paypalplugin_financial`

`cart/cart.isml`

`common/scripts.isml`

`home/homePage.isml`

`product/components/descriptionAndDetails.isml`

`product/productTile.isml`

`product/setDetails.isml`

`search/searchResults.isml`

Templates are up to date with SFRA 6.0

4.4 Support

To get help and support from PayPal:

- **PayPal Business support** – Go to PayPal's [Contact Us](#) and log in to your PayPal account.
- **Technical Support** – Go to the [Merchant Technical Support Help Center](#).

5 Examples

5.1 Financing Options API (Installment Calculator -UK merchants only)

To display financial options enable **Enable PayPal UK Credit Financial Options Banners** custom preference.

Financial option will be present at

- Category page - Figure 4
- Product detail page - Figure 5
- Cart page - Figure 6

Displayed options will depend on configuration done at PayPal side.
